

FIRE TRAINING CENTER

VENTILATION

Why, When, Where &

How

This 6 hour class explores the four critical questions of structure fire ventilation: **Why** is ventilation necessary; **When** is ventilation needed and how long will it take; **Where** is ventilation required; **How** should the ventilation be accomplished. Discussion will include the various types of ventilation including PPV, PPA, Horizontal, and Vertical Ventilation as well as VES. A review of the various roof types and construction will also be included in the classroom followed by an outside exercise practicing vertical and horizontal ventilation, PPV, and PPA. Students must supply their own PPE. No SCBA required. Instructor will be Lou Sclafani, District Chief Pinellas Park F. D.
