ST. PETERSBURG COLLEGE
IT SECURITY ADVISORY COMMITTEE
FEBRUARY 10, 2010

Attendees: Andrew Rikarts (VA), Bob Batie (Raytheon), Howard Wolff (Raytheon), Paul Vazquez (Raytheon), Damien Adams (UCH), Amy Brush (SPC), Kevin Thomas (SPC), Christine Pribyl (SPC)

Excused: Brad Owens (F. Templeton), Jeff Rohrs (Pin. Co.), Grace Roth (PWC)

Agenda Item	Discussion	Action
Spring Schedule/Productivity	SPC is offering 3 face-to-face classes and 3 online classes during Spring term. Overall productivity exceeds 100% due to online enrollment. Kevin Thomas has incorporated alternate activities for online students unable to access virtual machines due to the limitation of their home computer system. It was noted that 2 other programs (Programming and Networking) use the Intro to Network Security class as an elective.	None taken
Speaker Sign-Up	Students enjoy guest speakers. Having a question and answer opportunity for students is recommended, although the format of a speaker's presentation is up to that individual.	Two speaking engagements were booked for the remainder of the term.
Ongoing Goal: Increase Enrollment	Twitter and Facebook pages were set up per committee's recommendation. Facebook seems to be a more popular vehicle. Kevin would like to incorporate videos into Facebook; possibly videos on You Tube. A Facebook Group page was suggested. Yammer.com was suggested as an alternative to Twitter.	Kevin will make the appropriate videos and will investigate a Group page and Yammer.com
Ongoing Goal: Keep Curriculum Current	- All IT-SEC courses are approved for online delivery. Will try to do one class running parallel online and classroom delivery. Utilizing Webcam & Podcast audio was suggested. - CGS 2811 Incident Response now utilizes a Forensics book. Because the upper division has a class that mirrors the management level policy that CGS 2811 incorporated, Kevin changed the class to be more technical and shows how cyber forensics can be used. - Interactive content in classes – Cyber Protect 1999 will be used in some courses. It is less involved than Cyber Ops Net Warrior 2009, which possibly can be used for more advanced classes. IASE training videos are already being used.	Kevin will get the classes approved to be offered in a Blended format. Kevin will try the Navy's Cyber Ceige software to see if it is applicable. The Integration of De-ICE/Hackerdemia will also be looked at to see if it is compatible.
Possible Tech Crimes Institute	TLO (The Last One) in Miami has developed software that law enforcement can use in forensic investigations. There is a possibility that we can partner with them to offer a Tech Crimes Institute to train LE (non-credit for CEUs).	Staff is working on this.
Kevin Thomas/Associations	He has joined ISACA, Infragard, and ISSA. Attending meetings is a good networking opportunity.	Kevin will attend Infragard on 2/18, if possible.
Make Students Aware of Upcoming Events	The committee suggested posting Florida event information on the Facebook page, providing Links, etc.	As events are scheduled, they will be put on the IT Facebook page.

Miscellaneous	• Committee Robert Suarez has retired from Raytheon as well as actively participating on this committee	None taken.
	• Following up on endorsement by the NSA was discussed. The NSA endorses 4 year programs, and there was possibility of getting SPC's 2 year program endorsed.	Kevin will follow up.
	• Paul Vazquez noted that Raytheon has changed its IT operations from less defensive to more of an offensive exercise, with an emphasis on Information Operations.	
Next meeting	Committee suggested the first week in June. Note: Memorial Day is Monday 5/31. To avoid holiday conflicts the meeting could be held Tuesday May 25 or Thursday June 3.	Staff will poll members on availability.
