FREE MATH TUTORING

Let Us Help You Succeed!

Welcome, we are pleased to offer tutoring in the following subjects:

Pre-Algebra, Elementary Algebra, Intermediate Algebra, College Algebra, Liberal Arts, Statistics, Trigonometry, Pre-Calculus, Applied Calculus, & Calculus.

Our tutors are here to help you in the following ways:

- Serve as a guide and aid in your understanding of course content.
- Provide assistance with specific questions on homework problems that you have already attempted.

In order to make the most out of your tutoring session, be sure to:

- Come prepared with your materials (book, notes, printouts, etc.)
- Locate the first place you became confused and start there.
- Mark questions ahead of time, mark the pages in the book and in your notes or homework that you will need to refer to so that you can find them quickly.
- It is best to ask “why” instead of “how.”
- Ask specific questions, not just a review.

Less Helpful	More Helpful
“I don’t understand Chapter 4!”	“Can you show me an example of how to factor using the AC method from Section 2 of Chapter 4?”
“How do I do number 74?”	“Why did you subtract 3 from both sides when you were solving problem number 74?”

* **Please note that tutors are not a replacement for instruction and will not provide assistance with test questions.**

For an updated schedule of math tutors please visit <http://www.spcollege.edu/se/campus/services/tutoring.htm> or contact [Eric DeNooyer](#), (727) 394-6984, or [Thelma Wharton](#), (727) 398-8488
