

Use less, recycle the rest!

SPC's recycling program diverts tons of material from our local waste streams. **YOU can help!**

Small quantities of corrugated cardboard may be left in the corridors.

Tall blue containers with round holes in the top are for plastic, metal (including aluminum) and glass.

Small blue waste baskets in each office and classroom and tall blue containers with slotted tops are for all mixed paper.

Remember

- When a container gets contaminated, the whole load may go to the landfill.
- Don't recycle Styrofoam, paper with a wax coating, or products with food waste.

Set a recycling example that others will follow!
